

Please reference the specifications below to help guide the design of creative materials for your ISTE20 Live virtual expo participation.

Participating exhibitors will be provided with an expo profile builder toolset in late October. This will be the sole means to submit creative materials for your expo profile and will be available through the [Exhibitor Services Portal](#). Please do not email any files or information to Exhibit Management. If materials are sent to Exhibit management, they will not be acted upon.

Graphic header

Included in all exhibitor packages.

File types accepted: SVG, PNG, JPG, JPEG, GIF
