POSTER LOGISTICS

Your poster will be available for viewing throughout the conference. During your scheduled presentation time, you will click on the "Live Now" button to enter your discussion room. Your room will accommodate up to 100 people including presenters.

Attendees can drop in to learn more about your poster and engage more deeply with the content. We encourage you to prepare a three- to five-minute presentation that you can repeat during the 45 minutes if attendees arrive late, much like in the face-to-face environment.

To help you prepare, we’re offering training on our virtual platform as follows:

Saturday June 5, 2021 at 10:30am PST
Wednesday June 9, 2021 at 4pm PST
Friday June 11, 2021 at 8am PST

You’ll receive an e-mail with the link to the Zoom meeting the day before the training. If you aren’t able to attend a live training you can access an archived recording.

GALLERY IMAGE UPLOAD BY JUNE 15

Posters will be displayed in a graphically rich poster gallery. You can add an image to represent your poster in the poster gallery. This can be a thumbnail of your video or an image related to your poster. If you do not upload an image, we will auto-generate a thumbnail of your video for the gallery.

BUILDING YOUR POSTER BY JUNE 15

Top Section

The top section of your poster will already be populated with information about your session: title, description, presenters, topic, subject area, audience, grade level, skill level, schedule information for your live presentation, and attendee devices and specifications. Update these fields using the edit button at the top of the screen.

Demo Video (required by June 15)

The next section is for your demo video, which is required for your poster to be added to the poster gallery. Please prepare a three- to five-minute video to catch the attention of attendees and offer a preview of your project. You will submit your video as a URL link to a YouTube- or Vimeo-hosted video.

Poster Chat

Next to your video, there’s a chat window attendees can use to post messages. This chat feature will be available for the entire event.

Adding Resources

The resource section is where you can build your poster by adding images, PDFs, URLs to websites, a Facebook or Twitter feed, or more videos. After uploading these resources you can rearrange them on the page or delete them.

Additional Information

The final section is populated with more information from your session details: purpose & objective, outline, and supporting research.

On the right side of the page is a summary of information about your proposal including the ISTE Standards that are addressed.

Times and dates are displayed based on your device’s time zone setting.
